

Current Technology Assessment

A. Technology Integration with Curriculum and Instruction

At all grade levels every teacher has a laptop computer in their classroom for instructional and administrative purposes. Many classrooms also have additional computers for student use. Computer labs in each building allow students to access technology. High school students may use their cell phones, iPads, laptop computers and other personal devices in the classroom for instructional activities. They have access to the wireless LAN for internet connectivity on their devices. The elementary school has a CIV lab which is used frequently for virtual field trips. The high school has a CIV lab which is used to provide distance learning classes for students. Throughout the district almost all classrooms have an interactive white board and ceiling-mounted projector. All teachers have a document camera in their classrooms, as well. These tools are used to provide content-rich interactive lessons at all grade levels, K-12. Accelerated Reader is accessed via computers in all elementary school classrooms. Remediation is provided to students through interactive integrated learning systems, including A+ and My Skills Tutor. As these are web-based applications, students may access the remedial and enrichment content of these programs from anywhere they have access to a computer and the internet. Adaptive technologies are utilized in special education classrooms to assist students with learning disabilities.

The district has employed a coordinator of instructional technology to train teachers in effective uses of technology and to facilitate the successful implementation of technology into the classroom. The most effective professional development is job-embedded, gives teachers an opportunity to share what they know, to discuss what they want to learn, and to connect new concepts and strategies to their own unique contexts. In addition to traditional technology workshops and presentations, on-going technology training takes place informally at teacher request and formally through our "Laptop Lunches" program. Laptop Lunches is an opportunity to meet over lunch and take away a technology-rich tip that can be used in class almost immediately with the students.

Workshops, training and other professional development opportunities are available to teachers through Webex and other interactive digital technologies. Teachers use the IDEAS portal at aetn.org to access training and they attend virtual conferences through interactive web-based technologies.

The district is planning for the move to state-mandated on-line testing by upgrading our wireless infrastructure with new hubs, switches and wireless access points across the district. Increasing student access to online technology is planned through the purchase of additional mobile computer labs, personal computing devices such as touch pads, and upgrading the hardware in our existing labs. Additional bandwidth is planned with the addition of multiple T-1 circuits or equivalent to each building during the 3-year period of this plan. The goal is to have a T-1 circuit or equivalent per each 70 devices across the district. Parent involvement is aided by each building within the district having a web site that is maintained by a building-level web manager. Parents can access information about school events and find resources to assist their children in being more successful in the classroom. Teacher Access Center (TAC) and Home Access Center (HAC) are used across the district to allow parents and guardians real-time access to grades, homework, attendance and discipline data for their children. Email distribution lists are used by teachers to email and send text messages via cell phone to parents with information about their classes. Every administrator in the district has a blog that is accessible to the patrons of the district from the district web site.

Students who have access to the internet are trained in appropriate and responsible use of the internet by their teachers. The district has a filter on the LAN to filter internet content.

B. Professional Development

Teachers in the Drew Central School District are expected to have a basic technology literacy level that will support effective use of technology in the instructional program. The current International Society for Technology in Education (ISTE) National Educational Technology Standards for Teachers (NETS-T) have been adopted as the model for technology skills within the district. The five NETS-T standards include:

1. Facilitate and Inspire Student Learning and Creativity
2. Design and Develop Digital-Age Learning Experiences and Assessments
3. Model Digital-Age Work and Learning
4. Promote and Model Digital Citizenship and Responsibility
5. Engage in Professional Growth and Leadership

The most effective professional development is job-embedded, gives teachers an opportunity to share what they know, to discuss what they want to learn, and to connect new concepts and strategies to their own unique contexts. Frequent (monthly in formal presentations and as-requested basis individually and small-group) on-going Professional Development for Teachers, which supports the NETS-T standards, includes:

- Dropbox 101
- Scantron for Test Scoring, Polling and Balloting
- Word Clouds
- PollEverywhere for student response devices
- Apps to control your Presentations From your Cell Phone or iPad
- Using Document Cameras with Interactive White Boards
- Mimio Screen Clipping Tool
- Mimio Screen Annotation Tool
- Email Distribution Lists for Parental Involvement
- Using QR Codes in the classroom
- Prezi: Presentation with a Twist
- Google Spreadsheets in the Classroom
- Basic Troubleshooting
- Flip Teaching
- Blogging for Student Publishing to Authentic Audiences
- Creating Interactive Lessons with LiveScribe
- Teaching Digital Literacy and Citizenship
- TAC and HAC Training
- Other topics added based on teacher input

The change to eSchool will create opportunities and challenges for training for appropriate staff; including clerical, administrative and support staff. The district will rely on APSCN Field Support Staff to provide initial training. On-going training and support will be provided by users of the software within the district. ESchool training will begin in November 2011 and continue through 2012 on a regular, on-going basis.

Delivery methods for technology professional development include face-to-face, online web-based presentations, Virtual Reality, CIV, and video.

C. Equitable Use of Technology

Assistive technology includes Kurtzwell software, classroom amplification systems, Alpha Smart machines, Reading Pen scanners, and My Skills Tutor. These tools are used by the special needs students to meet their academic goals. Training is provided to faculty as part of the ongoing technology professional development plan. Kurtzwell is available in elementary and secondary Resource classrooms. AlphaSmart and Pen Reader tools are utilized at the secondary level. My Skills Tutor, while not in and of itself an assistive technology, is used within the Special Education program to meet the needs of students who are home bound or in alternative placements to maintain access to their curriculum in order to meet the goals of their Individual Education Plans.

D. Current Technology Inventory (2012-2015)

Every attempt is made to keep an accurate and up-to-date inventory of technology equipment. When hardware is purchased it is entered into the district inventory database by the district business manager when it is delivered to the school. Login scripts are incorporated to further identify the location of specific hardware. Periodic breakthroughs are conducted by the building principals and Instructional Technology staff to verify inventory. Inventory numbers are not assigned to individual items that are valued at less than \$1000.

There are currently 727 computers, printers and other devices (iPads, printers, projectors, IWB's, etc.) in the district inventory. There are 25 wireless access points (WAP) and an additional 48 hubs and switches for the wired LAN within the district.

Inventory Summary

District-Level

Number of Internet connected computers: 8

Number of printers: 6

Number of servers: 2 physical; 7 virtual

Number of rooms wired for internet: 8 (100%)

Number of telephone instruments: 13

Number of fax machines: 2

Satellite systems/equipment: 2

Network systems/equipment: 25 WAP, 48 hubs/switches

Distance Learning: 0

Elementary School

Number of Internet connected computers: 94

Number of printers: 19

Number of servers: 0

Number of rooms wired for internet: 20 (100%)

Number of telephone instruments: 8

Number of fax machines: 1

Satellite systems/equipment: 0

Network systems/equipment: 0

Distance Learning: 1

Middle School

Number of Internet connected computers: 91

Number of printers: 23

Number of servers: 0

Number of rooms wired for internet: 25 (100%)

Number of telephone instruments: 4

Number of fax machines: 1

Satellite systems/equipment: 0

Network systems/equipment: 0

Distance Learning: 0

High School

Number of Internet connected computers: 245

Number of printers: 44

Number of servers: 1

Number of rooms wired for internet: 53 (100%)

Number of telephone instruments: 23

Number of fax machines: 1

Satellite systems/equipment: 2

Network systems/equipment: 0

Distance Learning: 1

Retaining this type of information will be very helpful if USAC requests this information in the future.

List of Equipment	Serial #	Make & Model	Date of Purchase	Install Date	Original Location	Current Location	Replacement Date (if applicable)	Quantity	Notes
